

- \*Cylinder ownership is determined by the markings in the **collar** and **shoulder** area of the cylinder.
- \*When a permanent marking exists on a **RENTAL** sized cylinder it is the property of that company and can only be filled or exchanged there.
- \*Cylinders without markings or **C.O.C.** only cylinders are owned by the customer and may be filled or exchanged freely among companies.
- \*The removal of permanent cylinder markings immediately renders cylinder as unfillable by compromising ownership and cylinder safety requirements.
